

Coronavirus

Isolate your household

Stay at home

If you or anyone in your household has a high temperature or a new and continuous cough – even if it's mild

- ✔ **Everyone in your household must stay at home** for 14 days and keep away from others.
- ✘ **DO NOT** go to your GP, hospital or pharmacy.
- ✔ **Go to NHS.UK** to check your symptoms and follow the specialist medical advice. Only call NHS 111 if you can't get online or your symptoms worsen.
- ✔ **Protect** older people and those with existing health conditions by avoiding contact.

Find out how to isolate your household at nhs.uk/coronavirus

CORONAVIRUS

Stay at home:

Guidance for households

Stop the spread of coronavirus

- **Do not go** to work, school or public areas.
- **Do not have visitors** in your home, including family and friends.
- Have food, medication and other **supplies delivered to you**.
- **If possible, you should not go out** even to buy food or other essentials, other than exercise, and in that case at a safe distance from others.
- If you cannot move any **vulnerable family members out of the household**, **minimise** as much as possible **the time spent in shared spaces** such as kitchens, bathrooms and sitting areas.

If you live with a vulnerable person:

- Aim to **keep 2 metres (3 steps) away from them** whenever possible.
- **Use separate facilities** in your home as much as possible. Sleep alone and use a separate bathroom, if available.
- **Do not share** cups, eating utensils, towels, bedding or other items with them.

Wash your hands more often and for 20 seconds

Use soap and water or a hand sanitiser when you:

- Get home or into work
- Blow your nose, sneeze or cough
- Eat or handle food

Cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze and throw the tissue away straight away.
